

THE URANTIA BOOK

First printed in 1955, *The Urantia Book* contains over 2,000 pages of material on cosmology, religion, philosophy, science, sociology and history. It addresses the deepest questions of concern to humanity.

WHO WROTE IT?

The many authors of *The Urantia Book* claim to be personalities who inhabit a spiritual realm that encompasses the material one in which we live. As such, they have a perspective on reality that far exceeds our own. You need to decide for yourself if this holds true as you read what they have to say.

WHO PRINTED THE BOOK?

The process of communication between the spiritual and material realms for the purpose of creating *The Urantia Book* is not entirely clear, and the authors indicate that they would prefer it if we concentrate on what the book says rather than on the mechanics of its production. Too often people lose sight of the valuable spiritual messages in religion because they focus on the material details. We do know that a group of people were entrusted with the transcription and printing of the book during the first half of the 20th Century.

WHERE CAN I GET A COPY?
